Open Banking Feeds

The Open Banking module will allow you to connect your bank account to QuickFile in a secure and convenient manner. Open Banking is currently available for the largest 9 UK banks, we will be gradually rolling out access for all support banks on the Open Banking Program. Find out more here.

Natwest Bank Feed? support

HarefieldsCider

I am NOT using QF extension and have removed it. I can't see how it would be possible to use it on your site as it has been deactivated by you??

As explained in the original message I go bank feeds, click connect account, select Natwest etc etc, I arrive at the Natwest banking page, it asks me for my DOB and unique number, then asks me for various numbers from my pin and then asks me for three random characters from my password. I do all of this and enter Natwest, I then select the account I want QF to access and then confirm my choice. I am then taken to a page saying access has been extended to QF. I return to QF go to banking / banking feeds then land on the "banking feed overview page" but my Natwest account is not showing!!! THIS IS THE PROBLEM PART!!! You need to select the account on this page to complete the banking feed process within QF.

Question 1, is that the normal "connect an account process" ?
Question 2. Why does my account not appear on the "banking feed overview page" ?
